Innovation board · what to print

Ctrl+Alt+Defeat · as of Fri 13 Nov · qualifier Sat 5 Dec · board 48 × 36 in, folds at 12 and 36 in

1 · The pieces

PIECE	FINISHED SIZE	PAPER / PRINTER	WHAT IT SHOWS	FROM	STATUS
Blank trifold board	48 × 36 in	White trifold, 12 / 24 / 12 in panels (the one from 9 Oct)	Everything below is glued onto it	Ammar	ready
Left wing · PDF page 1	12 × 36 in	Print shop: **innovation-board.pdf** at 100% (actual size) on matte poster paper, one poster per page. At home: Adobe Reader → Print → **Poster**, 100%, Letter, cut and tape the tiles (left/right about 8 sheets each, centre about 16).	1 Identify, 2 Design: problem, why it matters, sources, expert, timeline. Frames for 10 photos and 8 quote strips	Mahdi	waiting on words
Centre · PDF page 2	24 × 36 in		Keys, title, 3 Create: our solution, how it works, what exists → what we made. Frame for the drawing	Mahdi	waiting on words (name only)
Right wing · PDF page 3	12 × 36 in		4 Iterate: shared with, what they said, before → after. 5 Communicate: who it helps, what changes. Team photo frame	Mahdi	waiting on words
Solution drawing	15.8 × 13 in	Hand-drawn on poster board, or 11 × 17 in landscape trimmed to fit	Our solution, every part labelled with an arrow	Mahdi	not made yet
Before and After sketches (2)	4.6 × 3.2 in each	Hand-drawn on plain paper, cut to size	Before: whole tree cut, new ones planted. After: half-cut trunk still a home	Ammar	not made yet
Physical prototype	—	Optional. The playbook says bring it to judging	Our solution as a model	Mahdi + Ammar	not made yet

Smallest text on the posters is 16 pt (quote strips), body text is 18–42 pt, headings 22–44 pt, title 118 pt: readable from 3–4 ft. Every box was checked to fit at this size.

2 · Photos to print, and the exact size

PHOTO	PRINT AT (GLUE WINDOW)	WHERE IT IS NOW	HOW	FROM	STATUS
Photo of the problem (25 Sep)	4.9 × 4.1 in	Drive	Both fit on one Letter sheet: insert into a Google Doc, set the size, print in colour, cut	Ammar	in Drive, print it
Our expert, Mr. Hussain	2.9 × 2.2 in	Ammar's copy. **Don't upload it to the website or the repo.**		Ammar	print it
8 students working, one each	2.2 × 2.1 in each	Elias's 9 Oct photos. Fallback: Mohamed's 30 Oct headshots (Drive); the website has 7 of 8, none of Abbas	All 8 fit on one Letter sheet (3 across, 3 down)	Elias	waiting on upload
Team photo, all eight	10.3 × 7.5 in	Not taken yet	Order an 8 × 10 print, landscape, trim to 7.5 in tall	Elias	not taken yet

3 · Still missing, by student

Mahdi

- ☐ Problem statement: it says our goal. Rewrite as the problem: what is happening to forests, who it hurts
- ☐ Why it matters: keep the 2–3 you say out loud
- ☐ Mr. Hussain's job, and how he knows about forests
- ☐ Date we talked to Mr. Hussain
- ☐ The labelled solution drawing

Mahdi + Ammar

- ☐ The solution's name (draft: “Forest Guardian”)
- ☐ One line each: what Nat Geo, WWF and WHO told us
- ☐ The change story: Mahdi says our expert's advice added cutting halfway; Ammar says a teammate said a half-cut tree is dead. Agree one
- ☐ Date of the survey; know its two numbers

Ammar

- ☐ Print the problem photo and the expert photo
- ☐ Date we shared with the Red team
- ☐ Before and After sketches
- ☐ Assemble: posters on, photos in their frames

Elias

- ☐ What the Red team said, with a name
- ☐ What a scrimmage judge said (24 Oct)
- ☐ Upload the 9 Oct working photos
- ☐ Take the team photo

Everyone (all eight) ☐ Abbas ☐ Ali ☐ Mohamed ☐ Husayn ☐ Haider ☐ Elias ☐ Mahdi ☐ Ammar — **your quote** for the strip under your photo: one sentence, about 10 words, about what you did on the Innovation Project. It goes on the board with your name.

4 · Order of work

1. Students bring the words above to class. Coach types them into **docs/print/innovation-board.py** (move each into the box's text, delete its “needs” line).
2. Run **python3 docs/print/innovation-board.py**, then **node docs/print/print.mjs**. It rebuilds the website board and this PDF pack, and stops if any text no longer fits its box.
3. Only then send the three posters to print. Print the photos the same week.
4. Glue the posters onto the board panel by panel, then glue each photo and sketch into its dashed window (sizes printed inside each window).

Students do the work: only words a student said or wrote, or the agreed solution, go on the board. The website board (This week → The two trifolds) shows the same boxes with who owns each missing piece.
