SCRATCH · TODAY'S TEST

Space Dodge

- Fly the rocket with the **arrow keys**.
- Grab the **stars** for points.
- Don't let the bouncing **planet** hit you.
- You have **30 seconds**.

> Build it yourself in one hour. You know almost every block already.

Set up

1. Go to **scratch.mit.edu** and click **Create**.
2. Delete the cat: right-click it under the stage and choose **delete**.
3. Click **Choose a Sprite** (bottom right). Search for **Rocketship** and click it. Then **Star**. Then **Planet2**.
4. Click **Choose a Backdrop** (far bottom right) and pick **Stars**.
5. Click the Rocketship and type **50** in its **Size** box. Do the same for Planet2. The Star stays at 100.

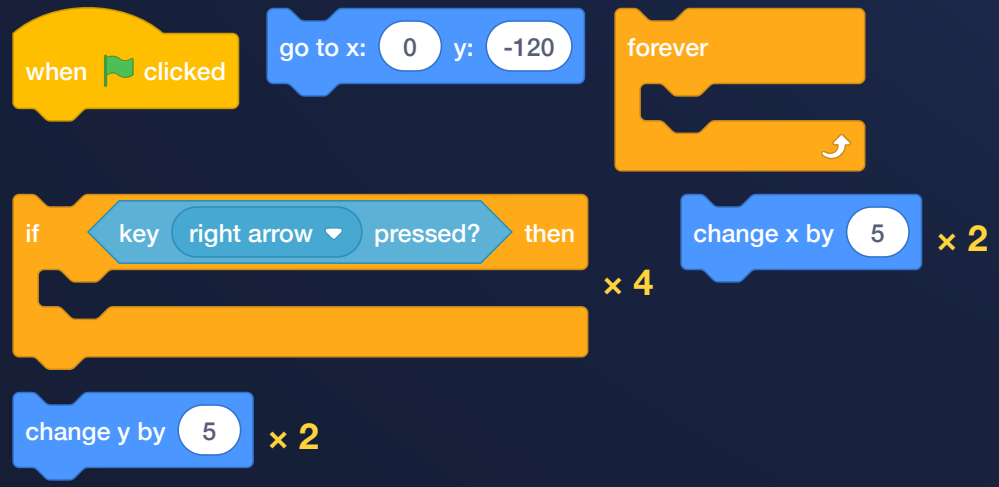

> Pick **Star**, not Starfish. Pick **Planet2**, not Earth.

Rocketship

1 · Fly

When the green flag is clicked, the rocket goes to x: 0, y: -120. Then, forever: if an arrow key is pressed, the rocket moves 5 that way. Left and down are -5.

BLOCKS YOU NEED

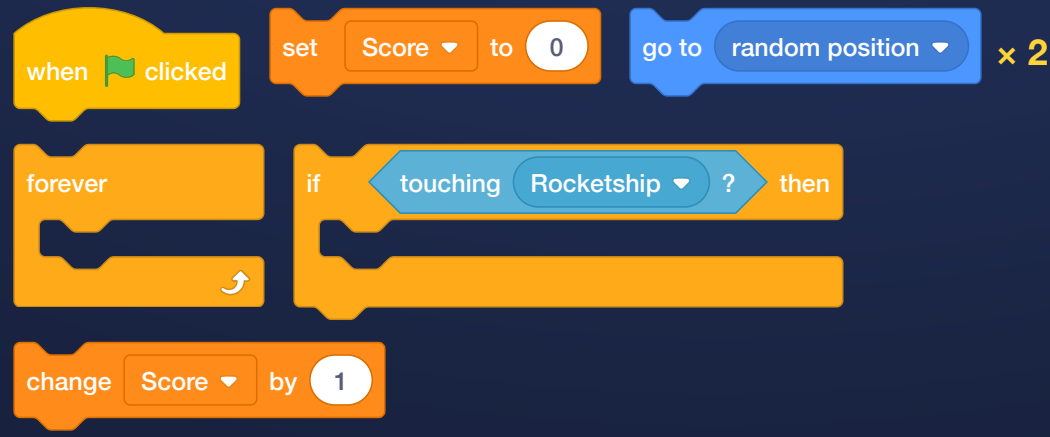

Test it: all four arrow keys fly the rocket.

Star

2 · Collect

Make a variable called **Score**. When the green flag is clicked: set Score to 0, and go to a random position. Then, forever: if the star is touching the Rocketship, change Score by 1 and go to a random position.

BLOCKS YOU NEED

Test it: fly into the star. Score goes up and the star jumps.

Click the green flag after every mission. Stuck? Try for **3 minutes**, then raise your hand.

Planet2

3 · Bounce

When the green flag is clicked: go to x: -180, y: 120, and point in direction 45. Then, forever: move 4 steps, and if on edge, bounce.

BLOCKS YOU NEED

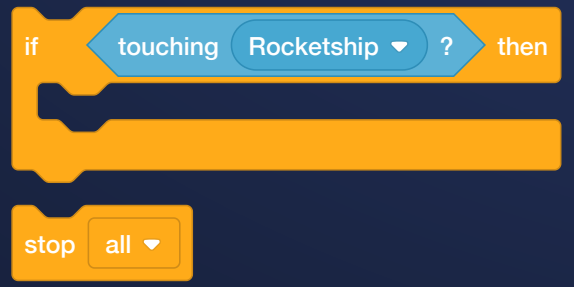

Test it: the planet bounces all around.

Planet2

4 · Crash!

Inside the planet's forever: if it's touching the Rocketship, stop all.

BLOCKS YOU NEED

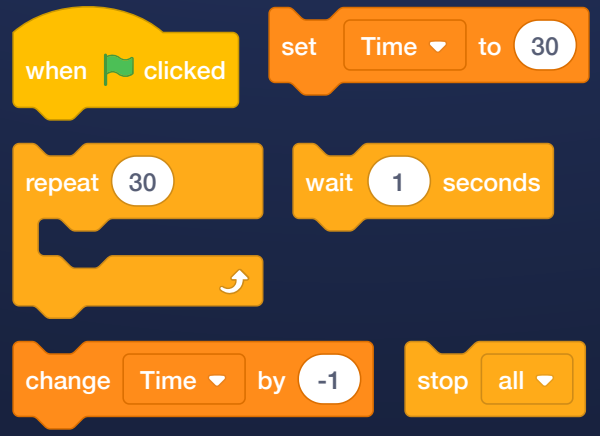

Test it: let the planet hit you. Everything stops.

Stage

5 · Countdown

Make a variable called **Time**, then click the Stage. When the green flag is clicked: set Time to 30. Repeat 30 times: wait 1 second, change Time by -1. After the repeat: stop all.

BLOCKS YOU NEED

Test it: Time counts down to 0, then the game stops.

All five work? Try these: add **start sound collect** to the Star · make the planet faster (move 6 steps) · right-click Planet2 and **duplicate** it · play for 60 seconds

Save your game

1. Click **File**, then **Save to your computer**.
2. Name it **Space Dodge** and your name.
3. Close the Scratch tab.

> Please don't show the next group your game. They're taking the same test.
